WORKING REVIEW - COMPLETE WITH THE CLIENT TEAM

Can this AI system hold a production state?

Use this review to expose the interface that limits a real enterprise AI system. Evidence should be attached or linked where possible. Unknown is a valid state; invisible is not.

OUTCOME	CONTEXT	MODEL	RUNTIME	AUTHORITY	EVIDENCE
SYSTEM / USE CASE Name, workflow, environment, business owner		REVIEW DATE + PARTICIPANTS Technical, product, workflow, risk, operations			
OUTCOME CONTRACT User / decision / workflow / baseline / intended consequence / success threshold / stop condition					
CONTEXT CONTRACT Sources / provenance / access / versions / freshness / quality / conflicts / sensitive data		MODEL CONTRACT Model / selection rationale / evaluation set / thresholds / error taxonomy / fallback			
RUNTIME CONTRACT APIs / dependencies / latency / throughput / availability / cost / degradation / rollback / recovery		AUTHORITY CONTRACT Advisory / review / approval / override / exception / escalation / prohibited actions			
EVIDENCE CONTRACT Technical health / business usefulness / adoption / overrides / incidents / drift / learning cadence / retirement criteria					
NAMED OWNERS Model / source / runtime / workflow / outcome / incident / change / retirement		WEAKEST INTERFACE Observed evidence / consequence / urgency / uncertainty			
HARDENING ACTION Change / test / monitoring / fallback / escalation / documentation / owner / due date					
BOUNDED PROOF Scope / users / traffic / duration / controls / rollback trigger		SCORECARD Outcome / reliability / economics / control / adoption / learning / ownership			

Disposition

SCALE	FURTHER BOUND	HOLD	ROLL BACK	RETIRE
DECISION RECORD AND NEXT REVIEW Evidence considered / dissent / unresolved risk / decision owner / next date				

Review rule: Approve scale only when the weakest interface has enough evidence, control, recovery, and ownership for the consequence of the use case.
