

Role-Aligned Resume

MEMBER OF TECHNICAL STAFF - ENTERPRISE AI

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Brings current AI-first operating transformation, agentic workflow design, high-reliability technical systems leadership, Python and TensorFlow exposure, and scaled operations discipline.

SELECTED EXPERIENCE

Director of Operations

2025-Present

Vape-Jet

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Founder / AI and Automation Advisor

2017-Present

DudeWorth

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, autonomous systems, transportation, network analysis, and workflow design.

Director of Operations and Engineering Management

2000-2013

Compunetics

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD.

Operations Management / Site Leader

2014-2018

Amazon

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

ROLE-ALIGNED CAPABILITIES

Enterprise AI system framing
Agentic workflow design
Human-in-the-loop controls
AI readiness and governance
Model-to-workflow integration
Reliability and root cause
Technical operating mechanisms
Cross-functional translation
Evaluation and evidence design

DIRECT TECHNICAL TOOLKIT

Python, SQL, JavaScript
TensorFlow concepts
LLM workflows and RAG patterns
Agentic AI and structured context
ERP/Odoo, Jira, Confluence
HubSpot, Slack, Tableau
GIS and mapping workflows

OPERATING THESIS

Enterprise AI scales when every model sits on an operable backplane.

Outcome, context, model behavior, runtime integration, human authority, and evidence must share one production contract.

Pittsburgh, Pennsylvania 412.287.8640 russelldudek@gmail.com linkedin.com/in/russelldudek github.com/russelldudek/Quick

Additional Evidence

TECHNICAL DEPTH + OPERATING TRANSFERABILITY

COMPLEMENTARY EXPERIENCE

Chief Pilot, Autonomous Systems and Aerial Data Operations 2018-2022

ZeusVu

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Regional Director

2021-2023

Cardinal Building Products

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Chairman of the Board

2014-2017

Enviro Social Capital

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept.

CMPT and EDS Pittsburgh Chapter Chair

2012-2016

IEEE

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

ENTERPRISE AI EXECUTION POSTURE

What I would own directly: system framing, workflow and interface maps, Python-based analysis or prototypes within verified capability, evaluation structure, human-authority boundaries, integration requirements, operational telemetry, incident learning, documentation, and cross-functional decision mechanisms.

What I would not overclaim: five years of foundation-model research, deep recent PyTorch/JAX specialization, or ownership of a large production MLOps platform.

EDUCATION

Bachelor of Science

University of Pittsburgh

- Academic grounding includes materials science, physical chemistry, and biology-related studies.

CREDENTIALS

Google AI Essentials

IBM Enterprise Design Thinking Practitioner

Six Sigma Certification

OSHA 10

HIGH-RELIABILITY THROUGH-LINE

Boundary-layer and materials-science foundation

Advanced electronics and high-consequence technical delivery

Regulated autonomous operations

24/7 scaled customer operations

Robotics, machine vision, and field telemetry

AI opportunity, workflow, governance, and adoption design

FIT BOUNDARY

Strongest when the role requires a systems-minded builder to connect AI models with APIs, controls, workflows, evidence, reliability, and ownership. Less direct for a role centered primarily on novel model research or low-level framework optimization.
